

Science: A Curse or a Blessing

Outline:

1. Introduction.
2. Science and superstition.
3. Revolutionary changes in Agriculture and Industry.
4. Miracles in medicine and surgery.
5. Printing Press.
6. Transportation and communication.
7. Science is helpful in reducing crimes.
8. Nuclear Weapons.
9. Blessing or Curse.
10. Conclusion.

Introduction

In present day, life is dominated by science. By applying the method of observation and experiment, scientists have been able to understand many important secrets of nature and they are used to making our lives comfortable. The achievements of scientists are far greater than those of philosophers, political thinkers, and economic theorists. In fact, the ideas of science have been the most creative. Science has greatly succeeded in getting rid of superstitious beliefs, and myths. It is against obscurantism, dogmatism, and bigotry. It has helped to put an end to several kinds of murders such as witch-hunting and the taboos of the early nineteenth century. Science has brought revolutionary changes in the field of agriculture and industry. Scientific methods of cultivation have stepped up agricultural production. The days of hand-made
